

PhD position available, Biochemistry lab

We look for a motivated full-time PhD student to join our lab at the Department of Biological Applications and Technology and the Biomedical Research Institute, Foundation of Research and Technology-Hellas in Ioannina and work on a funded project exploring the molecular and behavioral underpinnings of environmental and pharmacological interventions in high anxiety.

For expressions of interest, please send your CV along with a short motivation letter to Assoc. Professor Michaela Filiou (mfiliou@uoi.gr).

Keywords: molecular neuroscience, biological psychiatry, mouse behavior, anxiety, stress, mitochondria, proteomics/metabolomics, in vivo pharmacology, eating disorders
